### About me:

After a 5-year experience in a multinational company where I achieved experience in the working field, I decided it was time to continue my studies. I attended the courses of Forestry at Universitatea de Științe Agronomice și Medicină Veterinară in Bucharest, obtaining the engineer diploma in 2017. Having a curiosity for the field of plants, I studied thoroughly by following the masters program of Ecological Horticulture at USAMV Bucharest, where for the first year I obtained the first prize. I am currently a PhD student at USAMV Bucharest, where I am advancing the studies initiated at the Master in Ecological Horticulture, studying the almond and the behavior of this species in Romania.
